

White Paper for Divided Party (DiP) Brand Tokens

Background

Divided Party (DiP) was a new political party in South Africa, registered during 2019 at the Independent Electoral Commission. The name of the party changed to Federal Party SA (FPSA) because the meaning of the word "divided" was misunderstood as negative, whilst it referred to positivity about uniting left and right in one party, sharing South Africa.

DiP brand tokens represent the good ideas conciliation, mediation and dispute resolution, relevant in FPSA.

In order to raise capital for FPSA, 48% of the Divided Party brand value, is monetized with a new ERC20 Ethereum brand token.

The token was listed on Ipparts Exchange (IPPAEX).
